PROFESSIONAL SUMMARY

Full-Stack Developer with proven experience delivering web products end-to-end. Skilled in building scalable architectures and modern APIs, with solid understanding of UX and product thinking. Collaborative, adaptable, and committed to writing clean, maintainable code that drives business value.

PROFESSIONAL EXPERIENCE

Present — **Freelance Full-Stack Developer** — *Premium Property Rental Platform*
Led end-to-end development of an Airbnb-style web application for premium properties. Delivered features including property management (CRUD), interactive property maps, availability calendars, and an admin dashboard to manage listings and avoid third-party commissions.

```
Nest.js  /  Next.js (App Router)  /  Tailwind CSS  /  EmailJS  /  Google Maps API
```

08/24 – 02/25 — **Freelance Full-Stack Developer** — *Viandas del Sur*
Designed and implemented a logistics platform with role-based authentication, order lifecycle management, payment processing, and reporting. Architected REST APIs with JWT-based security and granular access controls. Delivered iterative releases using Scrum practices.

```
.NET  /  Entity Framework Core  /  Angular  /  SQL Server
```

03/23 – 02/25
part time — **Fraud Analyst** — *Aurum41 / Rowhela (Remote for Gibraltar)*
Conducted investigations on suspicious crypto-asset and digital banking transactions. Applied OSINT techniques, blockchain forensics, and anti-fraud methodologies within regulatory compliance frameworks. Collaborated with international compliance and risk teams.

EDUCATION

03/22 – 05/25 — **Technical Degree in Software Development** — *Instituto Superior IDRA*
Program focused on web development and software architecture. Strong emphasis on Object-Oriented Programming, full-stack development with REST APIs, design patterns, software architecture, relational databases, and agile methodologies.

03/25 – 05/25 — **AI and Machine Learning Program** — *Anyone AI*
Completed hands-on projects using AI models, FastAPI, and Docker.

03/22 – 02/24 — **Training in Fraud and Compliance** — *Aurum41*
Fraud prevention, regulatory compliance, and financial risk analysis.

FEATURED PROJECTS

03/25 — **Fan Token Web App – New York Dragons** — *Complete MVP (pending approval)*
Developed a responsive web application for sports fans, supporting user authentication (JWT), token purchases and redemptions, order tracking, and an admin dashboard. Implemented role-based access, order state workflows, and integrated business logic across frontend and backend layers.

```
Next.js (App Router)  /  Tailwind CSS  /  TypeScript  /  Prisma ORM  /  PostgreSQL
/  Express.js
```

TECHNICAL SKILLS

Frontend: Angular | Next.js (App Router) | Tailwind CSS | TypeScript

Backend: .NET | ASP.NET Core | Nest.js | Node.js | Express.js | JWT

Databases: PostgreSQL | SQL Server | Prisma ORM | MongoDB

Tools & DevOps: Git | Docker

LANGUAGES

Spanish (Native) | English (Advanced C1)
